Subject: Re: Dimock SAPs for Supplemental Round 1 and Round 2

Tito,
Yes, Terry did call me about the mercury. We got a recommendation from Ft. Meade to remove both silver and mercury near the end of our Round 1 sampling event. We did not find any of either analyte and stopped due to cost reasons. So, we were not proposing to do either analysis this time for either Round 1 or Round 2 sampling.
Thanks for the confirmation of the HQ EU concurrence. We will do some final coordination with Ft. Meade and let you know if they have any significant changes to be made. If not, we will be scheduling the Round 1 and Round 2 sampling events shortly.
Please let me know if you have any additional questions.

Rich:
Understand that Terry briefly spoke with you about this
Our only remaining comment/feedback pertain to Tables 1 and 2 of both documents which shows analytical method 245.1 and needs to be deleted, as this is the analytical method for mercury, which is not to be performed.
Other than the above comment, the HQ EOC EU and OEM is good to go with the sampling plans.

Thanks,
Gilberto "Tito" Irizarry

Subject: Dimock SAPs for Supplemental Round 1 and Round 2

Attached are the SAPs for Supplemental Round 1 and Round 2. We believe we have addressed all your comments.
Thanks for that input. Please review and confirm that these sampling plans have your concurrence. If you should have any additional questions, please let me know.
For your information, I still need to get Ft. Meade comments (if any). I will include you all in any substantive comments they may have. Once I have received your confirmation that these plans are ok and I address any Ft. Meade comments, We will begin to schedule the sampling at the homes. We will continue to keep you advised as to our progress.
